Subject: Update

Good morning Stephanie,

The Fire Department is in the process of developing an Incident Action Plan (IAP) for next two days, but to really focus on Saturday. Generally speaking we are going to bulk up staffing and units specifically in the area of City Hall and the Box alarm associated with the PD's western precinct. We also have reached out through mutual over last night and this morning to have access to some of our neighboring agencies resources.

The IAP is a written living document that the Incident Commander for Fire can adapt to our needs to mitigate issues in the city. Chief Segal is our Incident Management System (IMS) guru and he will lead in the fundamental structure of the system.

We will keep you up to speed as we move forward with this process.

Chief Ford
